

Connecting students around the world to the ocean and each other

EDUCATIONAL PASSAGES

MINIBOAT PROGRAM

Students work together to prepare, deploy, and track their very own miniboat while learning about **ocean currents**, weather, technology, and more. Each 5-foot long unmanned miniboat has a satellite transmitter, allowing you to track it as it sails across the ocean. **Connect** with the local school and community where it lands and learn about cultures around the world. Our Miniboat Program empowers students to become **citizen scientists** and global ocean stewards.

The **Miniboat in a Box** package includes everything you need to get started: boat parts, supplies, instructions, and custom webpage for tracking. We will also help with launching and troubleshooting as needed.

Start your miniboat journey today!

"We got to take charge of the whole experience - from naming the boat, to building it, to tracking it across the ocean."

- Elliana, 7th grade student participant

ENGAGE
students in a transoceanic voyage

BUILD
confidence and develop necessary S.T.E.A.M. skills

EXPLORE
oceanography, geography, math, history, and more

EMPOWER
the next generation of maritime professionals
