

# Invitation to Sponsor 2023 Recycle Regatta

The 2023 Recycle Regatta will encourage unique, experiential learning opportunities for students in grades K-12. In its fourth year, Recycle Regatta partners are working to connect with more educators in and out of the classroom to allow the regatta to be an accessible opportunity for all.

Recycle Regatta is aligned to the **Next Generation Science Standards (NGSS)**, **Ocean Literacy Principles**, and **CASEL Social and Emotional Learning Standards** for grades K-12. Participating students will walk away from the Recycle Regatta with an increased knowledge of engineering, environmental conservation, and mathematics. They will also gain an appreciation for recycling and stewardship, as well as enhanced social-emotional skills such as teamwork, confidence, and perseverance.

## Your Sponsorship Will:

- Support operational expenses that allow partners to plan and implement the Recycle Regatta.
- Provide free sessions of an open enrollment Online Experiential Learning (OEL) program led by NESS educators so students can participate without financial barriers.
- Provide items for sustainability-centered prize packages that further encourage environmental stewardship.
- Sponsor experiential educational programs and scholarships to further advance learning and enable academic growth beyond the Recycle Regatta by supporting NESS, NAMEPA, and Educational Passages' outreach to students.

### Contact us:

Cassie Stymiest, Educational Passages,  
cassie@educationalpassages.org

Molly Dushay, NAMEPA, m.dushay@namepa.net

Nina Quaratella, NESS, nquaratella@nessf.org

Beth Smith, NESS, bsmith@nessf.org

## Ways to Support

- *Monetary donation*
- *Prize donation*
- *Cross-promotion*

## Sponsorship Benefits:

By supporting Recycle Regatta you will increase visibility with the audience of each partner organization while empowering student learning and personal growth. This visibility equates to thousands of students, educators, and community groups with a collective mission to enhance environmental stewardship and educational opportunities.

Logo and writeup will be featured in the following:

- Recycle Regatta webpage
- Virtual information sessions
- Online learning programs
- Press releases
- Social media, e-mail listservs, newsletters and other forms of digital communication
